- Git
- Networks
- CI/CD

EDUCATIONS

Changemaker Educations

Frontend & App Developer

2021-2023

NTI

Foundation year in natural science

2014-2015

SUMMARY

Ever since I was a kid, I've been captivated by technology - gaming, computers, and creating things with whatever I could find. Throughout my career, I've been drawn to roles that allow me to work with tech and IT. Currently, I'm interning as a full-stack developer at Fragsheet, where I'm fully immersed in both front-end and back-end development. My ultimate goal is to become a senior full-stack developer, pushing the boundaries of what's possible with cutting-edge technologies and contributing to their creation. I am incredibly passionate about this field, and I can't wait to see where this journey takes me.

WORK EXPERIENCE

Fragsheet AB

At Fragsheet, I've improved their gaming site with AI and advanced stats, focusing on frontend development, AI creation, and Django/Python work. I've refactored and built features and also worked on API and database development with Django, Python, and other technologies.

- Frontend development
- AI/ML contribution
- Backend development
- Research of new tech
- Best practices implementation

Pinevision Design Studios

Their owner and CEO developed a CMS-tool that we built a company around. I helped them get started in the first year.

- Built the company from scratch
- Created our own CMS-tool
- Onboarded and trained customers and personnel
- Designed sites and logos

Evil Table Poker

Developed technology together with Connected Table to be able to play poker IRL through screens which made it legal in Sweden. Touch screens integrated in real poker tables. Had players playing for us and a club for gambling.

- Organized tournaments offline and online
- Had international players playing for us
- Developed our own hardware and software
